DESIGN GENRE

To help exhibitors decide on the style/techniques of work for some classes there is a descriptive abbreviation noted after some titles on each monthly listing.

We strongly recommend you stay with the method/techniques that belong to the design's specific family genre and never introduce another design family's method/techniques. The purpose of a specific design style is to explore the boundaries without breaking them while also applying the principles and elements of design.

Period Designs are from a specified time in past history, which may need researching and are marked **P** ... Traditional Designs are marked **T** ... Modern Designs are marked **M** and all three are contained in Part 1 of the handbook.

European Designs are marked **E** located in Part 2 of the handbook

Contemporary Designs are marked **C** located in Part 3 of the handbook

Interpretative Designs are marked **I**... these are open to your choice of design criteria
